Acknowledgements

- A small vote of thanks for all who have helped me in this journey of App Development – my parents, Mr Ken, Clevered and especially the mentors, Miss Prathiba and Miss Smita

About Me..

I am Hassan Ahmed Refdy and I live in the UK. I live together with two sisters, my mother, father and my grandparents. I am a very enthusiastic and fun-loving student who has a special interest for learning coding which is part of the progressive future

About My Internship with Clevered..

My experience with this Internship has been AMAZING! The coaches are very friendly and are always ready at hand to answer even the hardest of your doubts

About App..

- The main interface is kept simple as it is intended for the use of those with difficulties, physical or mental. It has all the srites to choose from and it will convey your message.
- My app, I hope, will be very useful to those who have speech disabilities for example due to autism or other medical conditions. All they have to do is click on an image that suits their need and it will convey the message to those around him. It is also a useful as it can tell you stories or play soothing music with a buddy called Dani

How do I use the App?

The Images

Tap any image that suits
your need and those
around you will be able
to understand your need

Dani

When you are bored,
feeling down, cannot
sleep or feeling stressed
Dani will be your buddy.
He can play relaxing
music and even read you
a story
